Hurricanes and Risk Items Investigation Timelines Cleared Consultants

HURRICANES AND RISK ITEMS

Hurricane Ian's impact is an example of a risk item impacting a facility.

For many companies, storms may impact the ability to continue operations and safeguard classified data.

Examining risk items like storms, power outages, and others on an annual basis is critical for continuity planning.

It is always a good idea to have an outside party examine your plan - FSO Services can help.

ABOUT FSO-SERVICES

Our services are centered around proven policies, procedures and training that deliver compliance with government security requirements.

INVESTIGATION TIMELINES

Clients often ask how long a clearance investigation will take. After the application is submitted, typical timelines range from 30 days to several months. It is imperative to examine your contracts and staffing to effectively plan clearance initiations so you can meet requirements. We help clients plan and execute to ensure they have the personnel needed to perform.

CLEARED CONSULTANTS

If you are using cleared consultants that you service in DISS, you must have a consultant agreement on file. This outlines the work they will be doing and the agreement that they will follow NISPOM and corporate security regulations. FSO Services helps clients develop, execute, and track these agreements. Contact us to learn more.
