

FSO SERVICES NEWS

JUNE 2023

We help clients maintain a simple and compliant security program.

CLOSED AREA TO OPEN STORAGE TRANSITION

For companies that have an approved closed area, DCSA requires new approval for what's now called open storage.

The DD147 form must be completed and approved by DCSA in order to maintain a classified space.

The new DD147 is much longer than it used to be, so work with your IS Rep as soon as possible to complete this process.

Questions from Clearance Applicants

The process of obtaining a security clearance requires an applicant to provide a fair amount of information, and questions are inevitable.

A guide is posted on the e-QIP site at the bottom of the page: [click here](#).

If you have a specific question, we can help!

FSO Services provides full support for clearance investigations, fingerprints, and ongoing maintenance of clearance records.

Contact us to learn more here: information@fso-services.com.

Owning vs. Servicing Relationships

DISS allows different types of relationships with clearance holders depending on certain factors. It's critical to maintain the proper relationship in DISS with both subjects you own and are servicing.

Owning: a direct employee of the company. The employees of your company will be set as an owning relationship in DISS.

Servicing: someone who performs a service for a SMO without being employed directly. An example would be a subcontractor working on a prime contractor site.

Still have questions? Contact us, and we can help explain it and go in more depth.
