FSO SERVICES NEWS

JULY 2023

We help clients maintain a simple and compliant security program.

UPDATES TO YOUR NISS PROFILE

FReviewing and updating your NISS profile is essential for maintaining facility clearance documentation.

NISS is the system of record that your DCSA Representative will view periodically and before conducting an audit.

Ensure you are keeping your Key Management Personnel (KMP) list up to date and other information about your company.

We help companies maintain a compliant industrial security program that includes all required documentation in NISS.

ABOUT FSO-SERVICES

Our services are centered around proven policies, procedures and training that deliver compliance with government security requirements.

To learn more, visit our new website: www.fso-services.com.

Participation in FISWG events

The Florida Industrial Security Working Group (FISWG) hosts events every quarter with presentations ranging from personnel and facility clearance updates to information system requirements for processing classified material.

As an FSO, being part of the security community helps you learn and develop a network of people engaged in protecting our nation's security.

Check out the website, and if you can attend an upcoming event, we highly recommend it. https://fiswg.research.ucf.edu.

FSO SERVICES NEWS

CAC card issuance to support access to government systems or bases

Common Access Cards (CAC) are used to grant access to a government base or for access to a CAC-enabled information system. In order to be issued a CAC card, you must have a valid background check (at least a tier 1) and fingerprints. We help companies with fingerprints and submitting CAC applications for the issuance of a government contract. If you need assistance establishing a CAC card process, we can help. Contact us to learn more: information@fso-services.com.

BUILDING A STRONGER INDUSTRIAL SECURITY COMMUNITY

Being involved in our industry is important. That's why **David Touchton** remains close to the industrial security community and gives his time and expertise at each opportunity. FSO Services supports NCMS, and David continues to mentor those new to the industry and use his experience and ISP certification to train others.
