

FSO SERVICES NEWS

SEPTEMBER 2023

We help clients maintain a simple and compliant security program.

DCSA CHANGING SYSTEMS

NAs we approach the go-live date of NBIS, cleared companies must ensure they have access to the new system and are familiar with how NBIS works.

Visit our news page at www.fso-services.com/news where you will find a step-by-step guide with detailed information on setting up access to NBIS.

Applicants will soon use eApp rather than e-QIP for clearance investigations, so visit DCSA.mil frequently for updates on this system change.

ABOUT FSO-SERVICES

Our services are centered around proven policies, procedures and training that deliver compliance with government security requirements.

To learn more, visit our new website: www.fso-services.com.

Building a Closed Area for Classified Processing

If you are building a closed area for classified processing, be sure to review the NISPOM requirements for construction. There are several considerations, ranging from how to construct walls, secure doors, and block openings with bars or grates. We help clients review their plans for closed-area construction to analyze gaps and prevent additional expenses. Contact us for more information.

Monthly Security Insights

Providing continuous updates to your employee base is vital to maintaining your industrial security program. We collect and distribute monthly security awareness newsletters that cover recent security events, changing requirements from DCSA, and threat awareness information. This helps keep your employees educated and aware of helpful information to maintain a strong security posture.

Simplifying the Fingerprinting Process

FSD Services helps companies collect and submit fingerprints for employees undergoing investigations.

We provide a simple process, fingerprint cards, and an easy way to mail the cards to us, where we scan and upload them.

Our fingerprinting card instructions can be found here: www.fso-services.com/wp-content/uploads/2023/09/FSD-Service-Fingerprint-Card-Instructions-Flyer.pdf.
