

FSO SERVICES NEWS

JUNE 2024

A collage of office scenes featuring several people working at desks with computers. A semi-transparent blue rectangle is overlaid on the center of the collage, containing the main headline.

We help clients maintain a simple and compliant security program.

Networking in the industrial security industry

The industrial security community is one of the most helpful there is. We are encouraged to work with other FSOs and ISSMs to answer questions and ensure compliance with the NISPOM.

There are networking events like FISWG and NCMS meetings that will help you meet others, share your knowledge and capitalize on theirs.

Getting to know others in the industrial security space is a great way to further knowledge and contribute to the industry.

Supporting organizations that give back to veterans

At FSD Services we focus our community outreach on organizations that support veterans.

Whether supporting Homes for Heroes, Wounded Warrior, America's VetDogs, or other organizations, giving back to our veterans is an important mission.

Join us at an event or consider making a donation to support these impactful organizations.

Common trouble with NBIS

We're all still getting used to the way NBIS works for clearance applications. Some common problems include lack of access to status, login failure and lockout, and employee application timeouts.

No matter what your challenges are, we've got you covered with thorough processes and expertise to help ease your journey with NBIS.

Let us know how we can help make your use of this critical system easier.

Security Rating Scorecard announced

The Defense Counterintelligence and Security Agency (DCSA), in partnership with industry, announced the successful joint development of a Security Rating Scorecard.

This was done in collaboration with the NISPPAC national working group. The new scorecard does not change the security review process. Industry should expect to see this implemented on October 1, 2024.
